* Dark, heavily pigmented Colours of Corian®, will show scratches, dust and ordinary wear and tear more readily than lighter, textured colours. We recommend that these colours not be used in applications where the surface is exposed to heavy use and contact (i.e. worktops). These colours are most suitable for applications where surface contact is light and for use as inlays and accent colours. For more information on selecting the ideal Colour of Corian® for your application, please consult with your DuPont® Corian® representative.

** The veining of these colours may vary in intensity and highlight points.

*** The appearance of this colour may slightly vary due to the high recycled content.

⦿ The "Illumination Series" introduces colours with superior translucency to enhance the potential for lighting effects with Corian®.

Possible finishes: matte, semi-gloss, gloss.

Different thicknesses and colours are available according to our special order policy. Standard dimensions are nominal (12 mm).

(1) - (4) indicate price groups.

Printed representation of colours may vary from actual samples.

* Plus que les tons clairs et texturés, les couleurs sombres et fortement pigmentées trahissent les éraflures, la poussière et les traces d'usage ordinaire. Nous vous recommandons de ne pas utiliser ces couleurs pour les applications où la surface est exposée à un usage intensif et à une multiplication des contacts (par exemple, pour les plans de travail), mais de les réserver pour celles où les contacts sont relativement légers ou pour créer des motifs décoratifs et des touches colorées. Pour plus d'informations sur la manière de sélectionner la couleur Corian® idéale pour votre application, veuillez contacter votre représentant DuPont® Corian®.

** Les veines de ces couleurs peuvent présenter des variations d'intensité et renforcer la perception visuelle des joints.

*** L'apparence de cette couleur peut légèrement varier à cause du pourcentage élevé de matériau recyclé.

⦿ La "Illumination Series" introduit des nuances d'une translucidité accrue tout le potentiel de jeux de lumière qui permet Corian®.

Finitions possibles: mat, semi brillant, brillant.

D'autres épaisseurs et couleurs sont disponibles sur demande spéciale. Les dimensions standards sont nominales (12 mm).

Les codes de (1) à (4) indiquent les groupes de prix.

Les couleurs illustrées peuvent présenter une variation par rapport aux échantillons réels.

* Bei dunklen und stark pigmentierten Corian® Farben sieht man Kratzer, Staub und Abnutzung stärker als bei helleren texturierten Farben. Daher empfehlen wir, diese Farben nicht für Anwendungen zu verwenden, deren Oberfläche stark strapaziert wird (wie beispielsweise Arbeitsflächen). Diese Farben sind eher für Anwendungen mit leichtem Oberflächenkontakt geeignet. Sie sind außerdem ideal als Inlays und Akzentfarben. Wenn Sie weitere Informationen zur Wahl der idealen Corian® Farbe für Ihre Anwendung haben möchten, wenden Sie sich bitte an Ihren DuPont® Corian® Repräsentanten.

** Die Maserung dieser Farben kann an Intensität variieren und Nähtstellen können sichtbar werden.

*** Durch den hohen Anteil an recyceltem Material kann es leichte Farbabweichungen geben.

⦿ Die "Illumination Series" stellt Farben mit ausgezeichneter Lichtdurchlässigkeit vor, um das Potenzial für Lichteffekte mit Corian® zu steigern.

Mögliche Oberflächenfinishung: Matt, Halbmatt oder Glänzend.

Verschiedene Stärken und Farben sind ebenfalls in unserem Verkauf- und Lieferbedingungen für Sonderbestellungen zur Verfügung.

Standardmessungen sind Nennmaße (12 mm).

(1) - (4) Preisgruppen.

Die Druckwiedergabe der Farben kann unter Umständen leicht von der Originalfarbe des Modells abweichen.

* Op donkere, sterk geïmpregte Colours of Corian® zijn krassen, stof en normaal slijtage eerder te zien dan op lichtere en meer gestructureerde kleuren. Daarom raden wij u aan deze kleuren niet te kiezen voor oppervlakken die intensief worden gebruikt en constant worden aangeraakt (zoals werkbladen bijvoorbeeld). Deze kleuren zijn geschikt voor toepassingen waar het contact met het materiaal minder intensief is, voor inlegwerk en om kleuraccenten aan te brengen. Wilt u meer informatie over hoe u de ideale Colour of Corian® voor uw toepassing kiest, neem dan contact op met uw plaatselijke Corian® specialist.

** Het aderenpatron van deze kleuren kan variëren qua intensiteit en kan veegen beter zichtbaar maken.

*** Deze kleur kan in werkelijkheid licht afwijken omwille van de aanwezigheid van een hoog percentage aan gerecycleerd materiaal.

⦿ De "Illumination Series" introduceert kleuren met superieure lichtdoorlatende eigenschappen waardoor nog meer verrassende lichteffecten met Corian® mogelijk zijn.

Mogelijke afwerkingen: mat, satijn-glaas, hoogglans.

Andere diktes en kleuren zijn beschikbaar volgens onze bijdrorde bestelvoorwaarden. Standaardafmetingen zijn nominaal (12 mm).

(1) - (4) verwijst naar de prijsgroep.

De hier gepresenteerde kleuren kunnen licht afwijken van de werkelijke kleuren.

* Le tonalità più scure, che contengono una quantità maggiore di pigmenti, rendono più evidenti i graffi, la polvere e in generale sono più soggette all'usura rispetto ai colori più chiari e ai motivi simili al granito. Per questo i colori più scuri non sono consigliati per applicazioni che prevedono l'uso continuo e intensivo della superficie (come i piani di lavoro, per esempio). Questi colori sono più adatti per applicazioni dove l'utilizzo della superficie è meno pesante, per realizzare interni o per dare risalto ai colori. Per ulteriori informazioni sulla scelta del colore di Corian® più appropriato per le vostre necessità, contattare il locale rappresentante di DuPont® Corian®.

** Le variazioni di questi colori potrebbero variare di intensità, evidenziando le giunture.
*** L'aspetto di questo colore potrebbe variare leggermente per l'elevato contenuto di materiale riciclato.

La "Illumination series" introduce colori di una luminosità superiore e tale da accentuare il potenziale di effetti luminosi di Corian®.

Finizioni possibili: opaca, semilucida, lucida. Altri spessori e colori sono disponibili per ordini speciali. Le dimensioni standard sono nominali (12 mm). (1)-(4) indicano i gruppi di prezzo.

È possibile che si verifichino leggere differenze tra le tonalità stampate.

* En las tonalidades más oscuras y más pigmentadas, se aprecian los arañazos, el polvo y el desgaste habitual con mayor facilidad que en los colores más claros y texturizados. Se recomienda no utilizar estos colores en aplicaciones cuya superficie esté expuesta a efectos pesados y contactos continuos (por ejemplo los encimeras). Estos colores resultan más adecuados para aquellas aplicaciones en las que el contacto con la superficie no es intenso y para su utilización como decoraciones y detalles con colores más vivos. Para obtener más información sobre cómo elegir el color de Corian® ideal para su aplicación, consulte a su representante de DuPont® Corian®.

** El vetado de estos colores puede ser más o menos intenso y hace que se vean más las uniones.
*** La apariencia de este color puede variar ligeramente debido a su elevado contenido reciclado.

La "Illumination series" introduce colores de gran transparencia que permiten el máximo de posibilidades de Corian® en iluminación.

Acabados posibles: mate, satinado, brillante. Otros espesores y colores están disponibles dentro de nuestra política de pedido. Las dimensiones estándar son dimensiones nominales (12 mm). (1)-(4) se refiere a la categoría de precios.

La representación impresa de los colores puede diferir de las muestras reales.

* Ao contrastar tons mais escuros e texturizados, as cores escuras, fortemente pigmentadas, revelam mais facilmente os riscos, o pó, os marcas da utilização quotidiana. Recomendamos que não utilize estas cores para superfícies expostas a uma utilização intensa (por exemplo as bancadas). Estas cores destinam-se sobretudo a revestir superfícies que não impliquem um contacto constante, sendo também ideais como base para instalações de outras cores. Para mais informações sobre como escolher a cor Corian® ideal para o tipo de aplicação e de decoração que deseja, contacte o seu representante DuPont® Corian®.

** O veto destas cores pode variar de intensidade e aumentar a percepção das juntas.
*** A aparência desta cor pode variar ligeiramente devido à elevada composição reciclada.

A "Illumination series" introduz cores mais transparentes de Corian® ideais para realçar os efeitos luminosos.

Acabamentos possíveis: sem brilho, semi-brilhante, brilhante. Outras cores e texturas podem estar disponíveis por encomenda. As dimensões padrão são nominais (12 mm). Os códigos (1)-(4) indicam os grupos de preço.

As cores apresentadas neste catálogo podem ter uma pequena diferença em relação às amostras reais.
